

Codebook

This codebook contains the definition of variables used in Steven Liao. “Chinese Foreign Real Estate Investment and Local Voting in U.S. Presidential Elections.” *International Studies Quarterly*.

Datasets

- `data-merge-county.RData`: A county-year level dataset used in the main analyses. The dataset contains 99 variables and 12,428 observations.
 - `year`: Year
 - `anticorrupt`: Year \geq 2013? 1 = Yes, 0 = No
 - `placebo_anticorrupt_2012`: Year \geq 2012? 1 = Yes, 0 = No
 - `county_fips`: County FIPS code
 - `county_name`: County name
 - `state_abb`: State abbreviation
 - `state_name`: State name
 - `aland_sqmi_county`: County land area (square miles)
 - `dem_share`: Two-party Democratic vote share
 - `china_undergraduate_county`: Total weighted number of Chinese international undergraduate students
 - `china_undergraduate_county_2012`: Total weighted number of Chinese international undergraduate students in 2012
 - `china_undergraduate_county_sqmi`: Total weighted number of Chinese international undergraduate students per square mile
 - `china_undergraduate_county_sqmi_2012`: Total weighted number of Chinese international undergraduate students per square mile in 2012
 - `cn_ug_sqmi_cat_2012_bi`: Dichotomous version of `china_undergraduate_county_sqmi_2012` with values $<$ the median = “CN-UG-low” and “CN-UG-high” otherwise
 - `cn_ug_sqmi_cat_2012_bi_low`:
`cn_ug_sqmi_cat_2012_bi` = “CN-UG-low”? 1 = Yes, 0 = No
 - `cn_ug_sqmi_cat_2012_bi_high`:
`cn_ug_sqmi_cat_2012_bi` = “CN-UG-high”? 1 = Yes, 0 = No
 - `cn_ug_sqmi_cat_2012_tri`: Trichotomous version of `china_undergraduate_county_sqmi_2012` based on terciles (“CN-UG-low”, “CN-UG-medium”, “CN-UG-high”)
 - `cn_ug_sqmi_cat_2012_tri_low`:
`cn_ug_sqmi_cat_2012_tri` = “CN-UG-low”? 1 = Yes, 0 = No

- cn_ug_sqmi_cat_2012_tri_medium:
cn_ug_sqmi_cat_2012_tri = “CN-UG-medium”? 1 = Yes, 0 = No
- cn_ug_sqmi_cat_2012_tri_high:
cn_ug_sqmi_cat_2012_tri = “CN-UG-high”? 1 = Yes, 0 = No
- ln_china_undergraduate_sqmi: $\log(\text{china_undergraduate_county_sqmi} + 1)$
- ln_cn_ug_sqmi_2012: $\log(\text{china_undergraduate_county_sqmi}_{2012} + 1)$
- china_graduate_county: Total weighted number of Chinese international graduate students
- china_graduate_county_2012: Total weighted number of Chinese international graduate students in 2012
- china_graduate_county_sqmi: Total weighted number of Chinese international graduate students per square mile
- china_graduate_county_sqmi_2012: Total weighted number of Chinese international graduate students per square mile in 2012
- cn_g_sqmi_cat_2012_bi: Dichotomous version of china_graduate_county_sqmi_2012 with values < the median = “CN-G-low” and “CN-G-high” otherwise
- cn_g_sqmi_cat_2012_bi_low:
cn_g_sqmi_cat_2012_bi = “CN-G-low”? 1 = Yes, 0 = No
- cn_g_sqmi_cat_2012_bi_high:
cn_g_sqmi_cat_2012_bi = “CN-G-high”? 1 = Yes, 0 = No
- cn_g_sqmi_cat_2012_tri: Trichotomous version of china_graduate_county_sqmi_2012 based on terciles (“CN-G-low”, “CN-G-medium”, “CN-G-high”)
- cn_g_sqmi_cat_2012_tri_low:
cn_g_sqmi_cat_2012_tri = “CN-G-low”? 1 = Yes, 0 = No
- cn_g_sqmi_cat_2012_tri_medium:
cn_g_sqmi_cat_2012_tri = “CN-G-medium”? 1 = Yes, 0 = No
- cn_g_sqmi_cat_2012_tri_high:
cn_g_sqmi_cat_2012_tri = “CN-G-high”? 1 = Yes, 0 = No
- ln_china_graduate_sqmi: $\log(\text{china_graduate_county_sqmi} + 1)$
- ln_cn_g_sqmi_2012: $\log(\text{china_graduate_county_sqmi}_{2012} + 1)$
- india_undergraduate_county: Total weighted number of Indian international undergraduate students
- india_undergraduate_county_2012: Total weighted number of Indian international undergraduate students in 2012
- india_undergraduate_county_sqmi: Total weighted number of Indian international undergraduate students per square mile

- india_undergraduate_county_sqmi_2012: Total weighted number of Indian international undergraduate students per square mile in 2012
- ind_ug_sqmi_cat_2012_bi: Dichotomous version of india_undergraduate_county_sqmi_2012 with values < the median = “IND-UG-low” and “IND-UG-high” otherwise
- ind_ug_sqmi_cat_2012_bi_low:
ind_ug_sqmi_cat_2012_bi = “IND-UG-low”? 1 = Yes, 0 = No
- ind_ug_sqmi_cat_2012_bi_high:
ind_ug_sqmi_cat_2012_bi = “IND-UG-high”? 1 = Yes, 0 = No
- ind_ug_sqmi_cat_2012_tri: Trichotomous version of india_undergraduate_county_sqmi_2012 based on terciles (“IND-UG-low”, “IND-UG-medium”, “IND-UG-high”)
- ind_ug_sqmi_cat_2012_tri_low:
ind_ug_sqmi_cat_2012_tri = “IND-UG-low”? 1 = Yes, 0 = No
- ind_ug_sqmi_cat_2012_tri_medium:
ind_ug_sqmi_cat_2012_tri = “IND-UG-medium”? 1 = Yes, 0 = No
- ind_ug_sqmi_cat_2012_tri_high:
ind_ug_sqmi_cat_2012_tri = “IND-UG-high”? 1 = Yes, 0 = No
- ln_india_undergraduate_sqmi: $\log(\text{india_undergraduate_county_sqmi} + 1)$
- ln_ind_ug_sqmi_2012: $\log(\text{india_undergraduate_county_sqmi}_{2012} + 1)$
- pop_county_tot: Total county population
- share_pop_county_female: The share of female population
- share_pop_under_5_county: The share of population under 5 years old
- share_pop_5_17_county: The share of population from 5 to 17 years old
- share_pop_18_24_county: The share of population from 18 to 24 years old
- share_pop_25_34_county: The share of population from 25 to 34 years old
- share_pop_35_44_county: The share of population from 35 to 44 years old
- share_pop_45_54_county: The share of population from 45 to 54 years old
- share_pop_55_64_county: The share of population from 55 to 64 years old
- share_pop_65_county: The share of population 65 years old and above
- share_pop_white_county: The share of White population
- share_pop_white_county_2012: The share of White population in 2012
- share_white_2012_cat: Trichotomous version of share_pop_white_county_2012 based on terciles (“low”, “medium”, “high”)
- share_white_2012_cat_low:
share_white_2012_cat = “low”? 1 = Yes, 0 = No

- share_white_2012_cat_medium:
share_white_2012_cat = “medium”? 1 = Yes, 0 = No
- share_white_2012_cat_high:
share_white_2012_cat = “high”? 1 = Yes, 0 = No
- share_pop_black_county: The share of Black population
- share_pop_hispanic_county: The share of Hispanic population
- share_pop_asian_county: The share of Asian population
- share_pop_cn_county: The share of Chinese population
- share_foreign_born_county: The share of foreign-born population
- share_enroll_county: The share of population enrolled in college or above
- share_edu_ba_above_county: The share of population with BA degree or above
- share_edu_ba_above_county_2012: The share of population with BA degree or above in 2012
- share_edu_ba_above_county_2012_tri: Trichotomous version of share_edu_ba_above_county_2012 based on terciles (“low”, “medium”, “high”)
- share_edu_ba_above_county_2012_tri_low:
share_edu_ba_above_county_2012 = “low”? 1 = Yes, 0 = No
- share_edu_ba_above_county_2012_tri_medium:
share_edu_ba_above_county_2012 = “medium”? 1 = Yes, 0 = No
- share_edu_ba_above_county_2012_tri_high:
share_edu_ba_above_county_2012 = “high”? 1 = Yes, 0 = No
- ln_pop_density_county: Population density (log)
- effective_tax_county: Effective tax rate (%)
- ipw_county: Trade Exposure (Imports Per Worker)
- gdp_growth: GDP growth rate (%)
- gdp_growth_2016: GDP growth rate (%) in 2016
- gdp_growth_2020: GDP growth rate (%) in 2020
- employ_rate_county: Employment rate
- employ_rate_county_2012: Employment rate in 2012
- employ_rate_county_2016: Employment rate in 2016
- employ_rate_county_2020: Employment rate in 2020
- median_household_income_county: Median household income (\$10,000)
- vacancy_county: Share of vacant houses
- vacancy_county_2012: Share of vacant houses in 2012
- vacancy_county_2012_tri: Trichotomous version of vacancy_county_2012 based on terciles (“low”, “medium”, “high”)

- vacancy_county_2012_tri_low:
vacancy_county_2012_tri = “low”? 1 = Yes, 0 = No
 - vacancy_county_2012_tri_medium:
vacancy_county_2012_tri = “medium”? 1 = Yes, 0 = No
 - vacancy_county_2012_tri_high:
vacancy_county_2012_tri = “high”? 1 = Yes, 0 = No
 - share_homeowner_county: **Share of homeowners**
 - share_homeowner_county_2012: **Share of homeowners in 2012**
 - share_homeowner_county_2012_cat: **Trichotomous version of share_homeowner_county_2012 based on terciles (“low”, “medium”, “high”)**
 - share_homeowner_county_2012_cat_low:
share_homeowner_county_2012_cat = “low”? 1 = Yes, 0 = No
 - share_homeowner_county_2012_cat_medium:
share_homeowner_county_2012_cat = “medium”? 1 = Yes, 0 = No
 - share_homeowner_county_2012_cat_high:
share_homeowner_county_2012_cat = “high”? 1 = Yes, 0 = No
- foia-county-cn-under-2012.RData: A county level dataset of Chinese international undergraduate students in 2012 used in the analysis “Figure-1.R”. The dataset contains 3 variables and 3,220 observations.
 - county_fips: County FIPS code
 - year: Year
 - china_undergraduate_county_sqmi_2012: Total weighted number of Chinese international undergraduate students per square mile in 2012
- nar-df.RData: A country-year level dataset used “Figure-A1.R”. The dataset contains 5 variables and 55 observations.
 - cty: Country
 - year: Year
 - sale: Annual sales to foreign buyers from the country
 - sale_total: Annual sales to all foreign buyers
 - share: The country’s share of sales among all foreign buyers in the year
- foia-zcta.RData: A ZCTA-country-year level dataset used in “Figure-A2.R” and “Figure-A5.R”. The dataset contains 7 variables and 3,619,827 observations.
 - cty: Student origin country
 - iso3n: Student origin country ISO numeric code
 - zipcode: ZIP code
 - zcta: ZIP Code Tabulation Area code

- year: Year
 - secondary: Total number of secondary-level students enrolled in institutions located in ZCTA based on FOIA data
 - undergraduate: Total number of undergraduate students enrolled in institutions located in ZCTA based on FOIA data
 - graduate: Total number of graduate students enrolled in institutions located in ZCTA based on FOIA data
- pres.RData: A county-year level dataset used in “Figure-A3.R”. The dataset contains 5 variables and 12,437 observations.
 - fips: County FIPS code
 - year: Year
 - state_abb: State abbreviation
 - dem_share: Two-Party Democratic Vote Share
 - rep_share: Two-Party Republican Vote Share
- foia-zcta-cn-under-2012.RData: A ZCTA-level dataset of Chinese international undergraduate students in 2012 used in “Figure-A4.R”. The dataset contains 5 variables and 33,112 observations.
 - zcta: ZIP Code Tabulation Area code
 - student_level: Student Program Level
 - year: Year
 - wt_total: Total weighted number of Chinese international students in ZCTA constructed from the FOIA data
 - student_origin: Student origin country
- cn-frei-dest.csv: A state-year level dataset used in “Figure-A5.R”. The dataset contains 3 variables and 65 observations.
 - year: Year
 - state: State
 - percent: State shares of Chinese FREI (%) from the National Association of Realtors
- data-merge-zcta.RData: A ZCTA-year level dataset used in “Figure-B1.R”. The dataset contains 52 variables and 326,646 observations.
 - zcta: ZIP Code Tabulation Area code
 - year: Year
 - anticorrupt: Year \geq 2013? 1 = Yes, 0 = No
 - placebo_anticorrupt_2012: Year \geq 2012? 1 = Yes, 0 = No

- county_fips: County FIPS code
- county_name: County name
- state_name: State name
- zhvi_mean: Mean Zillow Home Value Index in ZCTA
- ln_zhvi_mean: $\log(\text{zhvi_mean})$
- china_undergraduate: Total weighted number of Chinese international undergraduate students in ZCTA
- china_undergraduate_2012: Total weighted number of Chinese international undergraduate students in ZCTA in 2012
- china_undergraduate_sqmi: Total weighted number of Chinese international undergraduate students per square mile in ZCTA
- china_undergraduate_sqmi_2012: Total weighted number of Chinese international undergraduate students per square mile in ZCTA in 2012
- cn_ug_sqmi_bi_2012: Dichotomous version of china_undergraduate_sqmi_2012 with values $<$ the median = “CN-UG-low” and “CN-UG-high” otherwise
- cn_ug_sqmi_bi_2012_low:
cn_ug_sqmi_bi_2012 = “CN-UG-low”? 1 = Yes, 0 = No
- cn_ug_sqmi_bi_2012_high:
cn_ug_sqmi_bi_2012 = “CN-UG-high”? 1 = Yes, 0 = No
- china_graduate: Total weighted number of Chinese international graduate students in ZCTA
- china_graduate_2012: Total weighted number of Chinese international graduate students in ZCTA in 2012
- china_graduate_sqmi: Total weighted number of Chinese international graduate students per square mile in ZCTA
- china_graduate_sqmi_2012: Total weighted number of Chinese international graduate students per square mile in ZCTA in 2012
- cn_g_sqmi_bi_2012: Dichotomous version of china_graduate_sqmi_2012 with values $<$ the median = “CN-G-low” and “CN-G-high” otherwise
- cn_g_sqmi_bi_2012_low:
cn_g_sqmi_bi_2012 = “CN-G-low”? 1 = Yes, 0 = No
- cn_g_sqmi_bi_2012_high:
cn_g_sqmi_bi_2012 = “CN-G-high”? 1 = Yes, 0 = No
- india_undergraduate: Total weighted number of Indian international undergraduate students in ZCTA
- india_undergraduate_2012: Total weighted number of Indian international undergraduate students in ZCTA in 2012

- india_undergraduate_sqmi: Total weighted number of Indian international undergraduate students per square mile in ZCTA
- india_undergraduate_sqmi_2012: Total weighted number of Indian international undergraduate students per square mile in ZCTA in 2012
- ind_ug_sqmi_bi_2012: Dichotomous version of india_undergraduate_sqmi_2012 with values < the median = “IND-UG-low” and “IND-UG-high” otherwise
- ind_ug_sqmi_bi_2012_low:
ind_ug_sqmi_bi_2012 = “IND-UG-low”? 1 = Yes, 0 = No
- ind_ug_sqmi_bi_2012_high:
ind_ug_sqmi_bi_2012 = “IND-UG-high”? 1 = Yes, 0 = No
- share_pop_zcta_female: The share of female population
- share_pop_5_17_zcta: The share of population from 5 to 17 years old
- share_pop_18_24_zcta: The share of population from 18 to 24 years old
- share_pop_25_34_zcta: The share of population from 25 to 34 years old
- share_pop_35_44_zcta: The share of population from 35 to 44 years old
- share_pop_45_54_zcta: The share of population from 45 to 54 years old
- share_pop_55_64_zcta: The share of population from 55 to 64 years old
- share_pop_65_zcta: The share of population 65 years old and above
- share_pop_white_zcta: The share of White population
- share_pop_black_zcta: The share of Black population
- share_pop_hispanic_zcta: The share of Hispanic population
- share_pop_asian_zcta: The share of Asian population
- share_pop_cn_zcta: The share of Chinese population
- share_foreign_born_zcta: The share of foreign-born population
- share_edu_ba_above_zcta: The share of population with BA degree or above
- share_enroll_zcta: The share of population enrolled in college or above
- ln_pop_density_zcta: Population density (log)
- effective_tax_zcta: Effective tax rate (%)
- ipw_county: Trade Exposure (Imports Per Worker)
- employ_rate_zcta: Employment rate
- median_household_income_zcta: Median household income (\$10,000)
- vacancy_zcta: Share of vacant houses
